Money In Fruit Growing

Leading Orchardists Prefer Harrison Grown Fruit Trees

GROW FRUIT FOR PROFIT

Each season there are millions of dollars made in growing fruits. It is a well known fact a few acres of fruit will give you a bigger cash profit than any other crop you can grow. There is a big opportunity in growing fruit crops for the big markets and an equal opportunity to grow fruit for the nearby or roadside market.

HARRISON'S TREES ARE DEPENDABLE

Leading fruit growers prefer Harrison Grown Trees. They have learned they are dependable not from claims in a catalogue or talk from a salesman, but from actual performance on their own land. Each season we hear from many of our old customers expressing their appreciation of the trees we sold them. New trees bought from us, even thirty, forty and fifty years ago.

HARRISON'S TREES ARE HARDY

Harrison’s Trees by the tens of thousands have been planted in every fruit section of the Nation, as well as foreign countries, and invariably they give satisfactory results. Tests run by leading experimental stations throughout the Northern States and Canada definitely prove Harrison Grown Trees, variety for variety, are as hardy and sometimes harder than trees grown in northern localities.

BETTER TREES FOR LESS MONEY

It is true our method of propagation from parent trees that bear extraordinary crops of finest quality fruits for their respective varieties cost us more money per tree than the non-bearing scion block method used by most nurseries. By growing trees in extra large quantities we can practice certain economies that are utterly impossible for the smaller grower and results in our trees, size for size, being no higher in price than trees that are produced in a haphazard manner. We wish everyone who is interested in Fruit Trees could come to Berlin and personally look over the trees we are growing, you would soon see the reason why we are known as the “World’s Largest Growers of Fruit Trees.”

A Tip

Buy Now. Prices of Nursery Stock Are Rising But We Will Book All Orders Received Up Until February 1st, 1933 At The Prices Quoted In This Catalog. If You Are Unable To Plant Now We Will Reserve The Stock That You Desire And Make Shipment During The Spring Of 1933 Provided ½ Remittance Is Sent With The Order. Is Your Chance To Make A Big Saving.

HARRISONS’ NURSERIES, Inc.

BERLIN, MARYLAND

Plant With Harrison’s Bud Selected Super Strain FRUIT TREES They Give Results

SELECTED STRAINS—TRUE TO NAME

Every fruit grower should be interested whether or not the trees he is planting are true to name, and propagated direct from bearing trees that show superior fixed characteristics like size, color, yield, quality, growth and resistance to diseases and insects. There is only one way these characteristics can be controlled and passed on for the next tree that is by selecting for the parent trees from which the trees are propagated, direct from the best strains of the Highest Quality Fruit Trees. Harrisons' Bud Selected Super Strain FRUIT TREES are Harrisons' perfected selection of the fruiting qualities of the best varieties and strain that a grower can have to gain a very great difference in the degree of red color and size. At that time we selected our propagation stock and grew thousands of young trees that were planted here at Berlin. At the present time we have over 100,000 fruit trees that are perfectly grown in Harrisons’ Nurseries. Now remember these trees in our orchards were of known improved parentage and now we select our propagating wood from the best trees in our own planting, which results in trees that are really True Bud Selected Super Strain fruit trees. We know of no other concern in America who is equipped to propagate trees in this manner to any extent.

BIGGER YIELDS—BETTER COLOR

If there is any one thing that plays such an importance in profit making from fruit it is the matter of the yield. Harrison Trees are known as the heaviest yielding strains obtainable, which is directly due to the bearing habits of the trees. Next to yield is the matter of color, most fruit growers realize if their apples were more highly colored they would sell for more money. You can depend on Harrison Super Strain Trees to produce crops that have the finest color for their respective varieties.

YOUNGER BEARING

Do you want your trees to come into bearing at an early age? It is a recognized fact that trees propagated direct from bearing trees will commence to fruit at an earlier age than trees propagated from non-bearing scions. Harrison Grown Fruit Trees, due to the fact they are propagated from bearing trees, will produce profuse bearing crops in the earliest possible time.

HEALTHY—VIGOROUS

All Harrison Grown Trees are healthy and vigorous growing. Every possible precaution is taken to eliminate insect pests and diseases. To eliminate insect pests we have a Certificate of Nursery Inspection accompanies each shipment. Vigorous growth of trees means healthy plants. Trees, that grow only under artificial conditions, suffer from the parent trees that show these same characteristics. Thousands of dollars yearly are spent by us in improving the fertility of our soil to produce the best trees to be found in America.

Plant Now.

If they are dug before the hard frost the result is a total loss. Fall and early winter during the months of November and December are recognized by the most experienced planters as the best times for planting most varieties of fruit and ornamental nursery stock. By planting at this time you can be sure that the trees, plants and shrubs that you purchase are in the best condition for transplanting. If fall or winter flow normally stops there is a possibility that much damage will be done to the plants in transplanting.

In states bordering and just south of the Mason-Dixon line practically all items can be planted anytime during the winter that they are to come from stock.

Do Not Let A Few Light Frosts And Freezes Delay Your Planting This Year.

Fall and winter planted stock has one great advantage over spring planted stock in that it will start to grow earlier in the spring. It is a well known fact that the roots on all trees; plants and shrubs grow during the winter time and get well established before the late spring drought. It is a mistaken idea among many planters that nursery stock should be planted early in the fall. However, this is naturally wrong as it is necessary to let the stock be in a healthy state before being planted. After a few cold periods and before the ground is frozen is the ideal time for planting deciduous stock.

Make Money With Peaches

Rio Oso Gem
World’s Largest Peach

Late yellow, freestone, ripening about two weeks later than Elberta. The color is unique as it starts to take on its beautiful dark crimson red color about one week before it begins to ripen. Its size is larger than J. E. Hale and resembles that variety to a certain extent. Bears heavy crops annually and has already become a great late peach. We recommend every peach grower to plant this variety.

Prices apply only to the quantities of Rio Oso Gem Peach trees ordered. For the assorted varieties of other Peaches and other fruits.

Euphelia, White, free-stone, highly colored, very productive.

Early Varieties, Continued

SOUTH HAVEN. Yellow, freestone, large, handsome, uniform size, delicate flavor, ripens about 15 to 18 days earlier than Elberta, extremely hardy, good grower, and a consistent heavy bearer, adapted to cold climates; produces bumper crops in mild climates.

VALIANT. Yellow, freestone, prolific producer, productive.

VEDUTE. Yellow, freestone, highly colored, very productive.

Early Midseason Varieties

CHAMPION. White, free-stone, very large, creamy white with red cheek, sweet, juicy; very high flavor.

EARLY MARY. Yellow, free-stone, large, lemon yellow with a dark cast, blush with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a bit firmer and with richer color. Good bearer and makes a delicious fruit for canning.

HALE HAVEN. Yellow, free-stone, colors before ripening, hanging heavy on the tree. A delicious fruit in every peach section. 10c per tree extra.

ROCHESTER. Yellow, freestone, large, covered with medium red blush; large stone, browned with red at pit, very good quality, prolific bearer. One of the best early midseason yellow freestone peaches for nearby markets, and highly desirable for canning.

SLAPPY. Yellow, free-stone, attractive and extra good flavor.

Veteran. Yellow, freestone, large variety.

Midseason Varieties

BELLE OF GEORGIA. Medium, large, white, free-stone, recommended as the white peach, should be included in every planting. Very hardy and productive.

ELBERTA. The great and best Money-making Peach. Yellow, freestone, Midseason. Fruit is large to extra large, golden yellow with brilliant shades of red, firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any peach. It has been the standard for all other peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. This attractive appearance and the uniform large, delicious, juicy fruit make it almost a sight. We offer original strain trees which is the best strain obtainable.

J. E. HALE. Extra Large Size. Yellow, free-stone, extra large, beautiful red coloring, firm and of the highest quality, a prolific producer. We guarantee this variety for two or three years prior to Elberta. We offer original strain trees.

OLD MIXON. White, free-stone, good flavor.

RAY. A highly popular peach, bears when other peaches fail. Ideal for nearby markets andrade stands.

Elberta, White, semi-freestone, new variety.

Early Hiley. An earlier maturing strain of Hiley. (June buds only).

Eclipse. Yellow, free-stone, bears large crops.

Golden Jubilee. The Supreme Early Yellow Peach, Commercial peach orchardists for a century have been looking for an early peach of high quality, fine flavor, yellow, freestone, attractive color, and firm texture, and eventually they have found it in the marvelous Golden Jubilee. This variety is a sensation of recent introduction of new varieties and is by far better than any early variety of commercial importance which has been introduced in many years. It ripens about four days ahead of Cramton.

Hiley. Bears heavy crops of fancy peaches. Early, white, freestone, medium size, highly red colored and is a very handsome peach of exceptionally good flavor. Tree is strong grower, very healthy and an extra heavy bearer. One of the best varieties, if not the best variety, on Hiley to bear heavy crops year after year. The marvelous color and wonderful flavor have made it popular on the market.

Mamie Ross. White, freestone, large size.

Carmen. Semi-freestone, medium size white.

Cumberland. White, semi-freestone, new variety.

Very early varieties

BRACKETT. This fruit is rich yellow with dark crimson check. Size is as large or larger than Elberta and much better flavored. Begins to ripen a few days later than Elberta.

Crawford Late. Yellow, free-stone, an old commercial favorite.

Robert. A comparatively new variety of early peach. Seems to resemble the Elberta in many respects. Ripens about a week to ten days later. An excellent variety to pick the Elberta region.

Snippers Late Red. Extremely attractive.

William. Yellow, freestone.

Late varieties

Bee Shook. Yellow, freestone.

Beryl Favorite. White, freestone.

Fox Seeding. White, freestone.

Iron Mountain. White, freestone.

Salberta. Yellow, freestone, large, having a satisfactory cross between Elberta and Salwey. Solberta inherited the size, quality and productiveness of Elberta, and inherited the luster in skin of Salwey.

Krummels (Krummels Late October). Yellow, free-stone, round, fine flavor.

Salwey. Yellow, freestone.

It pays to plant the best trees—Harrison’s peach trees are the best peach trees you can plant in your orchard. Our superior Berlin climate and soil plus Harrisons’ method of propagating, planting, budding, spraying, pruning, digging, grading and packing are what makes our trees great. If we could get you to come to Berlin we would show you all the details. If you cannot come and will send us your order we will stake our reputation on the promise that you will get the very best trees that can grow.

QUALITY PLANTS AT A LOW PRICE

AMERICAN ARBORVITAE. The largest seller of all Arborvitaes. Erect, pyramidal habit, bright green foliage, dense from ground up. Rapid grower.

CHINESE ARBORVITAE (Biotia orientalis). Rather stiff columnar habit, bright green foliage. Very attractive.

IRISH JUNIPER. Forms a narrow and dense column, compact, bluish-green foliage. Most attractive when planted around the foundation of a home, at corners and entrances. Widely used in formal gardens.

Prices of the above Varieties: 1 to 18 in. $0.60 each, 3 for $1.20, 6 for $2.10, 10 for $3.00; 18 to 24 in. 90c each, 3 for $2.40, 10 for $5.00, 2 to 3 ft. $1.25 each, 3 for $3.00, 6 for $5.40, 10 for $9.00; 3 to 4 ft. $1.75 each, 3 for $3.75, 6 for $6.90, 10 for $12.00; 4 to 5 ft. $2.50 each, 3 for $6.00, 6 for $11.40, 10 for $17.50.

COMPACT GLOBULAR ARBORVITAE (Thuja occidentalis compacta). Natural compact globe-shaped. Needs no trimming. 18 to 24 in. 50c each, 3 for $1.50, 6 for $2.50, 15 to 18 in. 75c each, 3 for $1.50, 6 for $3.00; 18 to 21 in. $1.00 each, 3 for $2.50, 6 for $3.00, 21 to 24 in. $1.35 each, 3 for $3.30, 6 for $5.40, 2 to 3 ft $1.75 each, 3 for $3.75, 6 for $6.90, 2 1/2 to 3 ft. $2.50 each, 3 for $6.00, 6 for $11.40.

SPREADING EVERGREENS

ANDORA JUNIPER. Low spreading type, purple bronze color during winter.

PITZERS JUNIPER. Most popular spreading Jupipers.

SAVIN JUNIPER. Spreading vase shaped growth. One of the most attractive spreading evergreens.

Prices of above Varieties: 12 to 15 in. spread 75c each, 3 for $1.85 each, 6 for $4.05; 15 to 18 in. spread $1.25 each, 3 for $3.00, 6 for $5.40, 10 for $8.00; 18 to 24 in. spread $1.75 each, 3 for $4.50, 6 for $8.60, 10 for $15.00.

PRIZE NON-EXPENSIVE

FERN LIKE ARBORVITAE (Thuja occidentalis frondosa). Pyramidal shape, dark green foliage.

HINOI K RELONISPOA (Retinospora oblonga). Compact pyramidal form slightly drooping tips, dark green flat foliage.

LZ GOLDEN ARBORVITAE (Thuja occidentalis elegans). Compact, pyramidal shape; golden green foliage, similar.

NORWAY SPRUCE (Picea excelsa). Open pyramidal growth, planted everywhere, evergreen.

PLUME LIKE RELONISPOA. A handsome evergreen from Japan with feathery foliage. Upright grower, broad at base, excellent for foundation plantings. We offer it in green or golden foliage.

ISPIEROSA RELONISPOA. A handsome loose growing pyramidal evergreen, fed in either green or golden foliage.

PYRAMIDAL ARBORVITAE (Thuja occidentalis pyramidalis). A really beautiful evergreen that should be included in every planting. It grows tall and narrow, requires no trimming and assumes its bright green color throughout the whole year. A pair of them placed at the entrance or at the corner of a house makes a superb showing.

SWEDISH JUNIPER. Tall, columnar habit, dense, fairly broad foliage, drooping tips.

THNE LIKE RELONISPOA (Retinospora foliosa). Has 1/2 to 1 ft., dense, attractive, slow growing.

TOM THUMB ARBORVITAE (Thuja occidentalis elwangeriana). A low, broad pyramidal form of evergreen with slender branches and feathery foliage.

VEITCH'S JAPANESE RELONISPOA (Retinospora squarrosa var. foliosa). Foliage silver-blue, feathery and dense, giving soft woolly appearance. Broad pyramidal outline. One of the best Retinospora.

Prices of above Varieties: 18 to 24 in. 90c each, 3 for $1.95, 6 for $3.90, 10 for $6.00, 2 to 3 ft. $1.50 each, 3 for $3.75, 6 for $6.90, 10 for $12.00, 3 for $5.25, 6 for $9.50, 10 for $15.00; 4 to 5 ft. $3.00 each, 3 for $7.50, 6 for $14.00, 10 for $22.00.

BLUE TINTED EVERGREENS

MEYERS JUNIPER. Grows irregular, blue color, handsome.

SPINY GREEK JUNIPER. A tall grower of upright columnar habit and bluish-green foliage. The growth is so slow that the tree is well adapted for foundation plantings and other situations requiring dwarf trees.

VIRGINIA BLUE JUNIPER. Broadly conical form and beautiful bluish-blue foliage make it one of the choicest evergreens.

Prices of above Varieties: 15 to 18 in. $1.00 each, 3 for $2.25, 6 for $4.50, 10 for $8.00; 18 to 24 in. $1.40 each, 3 for $3.50, 6 for $6.50, 10 for $9.00, 2 to 3 ft. $2.50 each, 3 for $5.00, 6 for $8.00, 10 for $12.00.

ARISTOCRATIC EVERGREENS

JAPANESE SPREADING YEW (Taxus cuspidata). The beautiful yew of moderate bushy growth, the upright spreading branches clothed with bright leaves of dull green. Hardest of all yews, grows in semi-shady locations.

SPREADING ENGLISH YEW (Taxus baccata repandens). Low spreading, dwarf grower, with dark, glossy green foliage.

Prices of above Varieties: 12 to 15 in. spread 85c each, 3 for $1.95, 10 for $3.50, 15 to 18 in. spread $1.35 each, 3 for $3.80, 10 for $6.35, 18 to 24 in. spread $2.00 each, 3 for $3.50, 10 for $11.50.

UPRIGHT ENGLISH YEW (Taxus baccata cupressiformis). Upright grower; dense, green foliage. Makes a most attractive specimen plant when fully matured. 12 to 15 in. 85c each, 3 for $1.95, 10 for $3.50; 15 to 18 in. $1.50 each, 3 for $3.50, 10 for $6.90; 18 to 24 in. $2.20 each, 3 for $5.60, 10 for $15.00; 2 to 3 ft. $3.00 each, 3 for $5.10, 10 for $15.00, 3 for $6.00, 6 for $11.40, 10 for $17.50.

IMMEDIATE RESULTS ARE SECURED WITH HARRISON'S "HI-QUALITY" EVERGREENS

The roots of each evergreen is dug with a ball of rich earth and wrapped in burlap.

They are sure to please you.

Freight is the most economical way of shipping Balled and Burlapped plants.

Remember! Houses Are Cold and Uninviting Until The Marvel of Growing Things Transform Them Into Real Homes.

50c each. 3 for $1.50; 6 for $2.40; 12 for $4.40; 50 or more 35c each.

Every Rose We Offer is A Hardy Two Year Field Grown Plant And Has Already Bloomed In The Nursery Row.
America's Favorite Flowering Shrubs & Trees

Hedges Make Beautiful Living Fences

CALIFORNIA PRIVET

(Ligustrum ovalifolium)

We grow California Privet by the million. Most popular hedge plant; can be trimmed to any desired shape. For planting long hedges, this is the most economical variety. Quick grower. Prices per each plant:

- 1 to 9 plants: $0.05
- 10 to 49 plants: $0.04
- 50 to 299 plants: $0.03
- 300 or more: $0.02

RED-LEAVED BARBERY

(Berberis thunbergii Atropurpurea)

A highly important introduction among shrubs, giving us for the first time a practical easily grown shrub of medium height, with good, distinctly red foliage. This must prove a boon to all types of landscape where current standards are spoken of with the shrub foliage depending on for any landscape. Prices per:

- 1 to 9 plants: $0.05
- 10 to 49 plants: $0.04
- 50 to 299 plants: $0.03
- 300 or more: $0.02

JAPANESE HUCKLEBERRY

(Lonicera maornoii)

Early white flowers in June, followed by red berries.

PINE WIGELIA

Delicate pink bell-shaped flowers.

PUDSY WILLOW

Shrub or dwarf tree with fur-like catkins during early spring.

RED-BRANCHED CORIOL DOGWOOD

(Cornus sibirica)

Bright red foliage, white flowers, blue fruit; gives a beautiful winter effect.

SPIREA BEECHESIANA

Fast grower, graceful white flowers in the spring.

TARTARIC HUCKLEBERRY

Abundance of pink or white flowers followed by red berries. Stone color desirable.

TAMARISK AFRICAN

Feathery, gray-green foliage; effective near water. Thrives at seaside.

Prices of these varieties: 12 to 18 in., 25c each; 3 for 50c; 6 for $1.00; 10 for $1.50.

FRAGRANT SOLDIER WILLOW

Pink, fragrant flowers in May and June. 12 to 18 in., 50c each; 3 for $1.00; 6 for $1.50; 10 for $2.00.
